ABOUT US

With 22 years of experience as a Joint Stock Company, we have brought our high-quality service approach—originally offered to both domestic and international guests in the tourism sector—into the field of sports tourism in recent years.

Every year, we successfully organize training camps for dozens of professional and youth football teams, primarily in Antalya and other prestigious tourism and sports regions across Turkey.

Our company is now taking major steps in football camps. We have previously managed international events, such as European and World Championships organized by federations under the Ministry of Sports, hosting 1,000 to 2,000 foreign athletes. We meticulously planned and executed all aspects of these organizations, including flight tickets, hotel accommodations, airport transfers, and more.

Our venture into football camps stems from the growing popularity of sports tourism and our desire to offer more comprehensive services tailored to athletes' needs. We aim to provide comfortable and productive training environments through well-organized camps.

Our experienced and expert team will deliver customized packages and services tailored to athletes' needs. Flights, accommodation, transfers, training facilities, and all other details will be carefully planned and managed by us—allowing teams to focus solely on football and perform at their best.

With football camps, we aim to become a key player in sports tourism. Backed by our experience and service quality, we will meet the needs of athletes and teams in the best possible way and offer them an unforgettable experience. As always, we will continue delivering successful events while maintaining our leadership in the industry with a customer-focused and quality-driven approach.
